3 The Internet and Technology

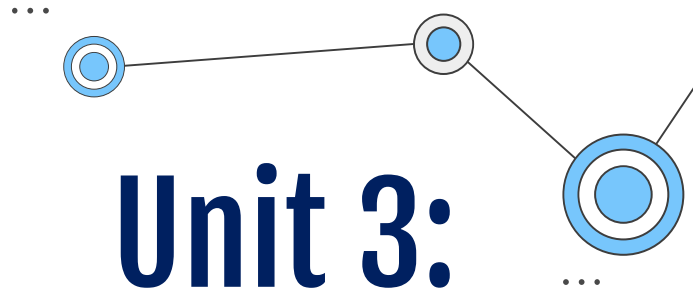

4 Weather and Climate

...

Unit 3:

**The Internet
and
Technology**

...

Activate your knowledge

What are some examples of technology used nowadays?

Advantages of technology

Disadvantages of technology

- The dangers of using a mobile phone and not paying attention, e.g. driving, crossing roads, being mugged
- Spending too much time at a computer, e.g. could harm eyesight, posture, etc.
- Addiction to social media sites or online gaming
- Security issues

Preparing to watch

1. Do you mainly use the Internet on your cell phone, a tablet, or a computer? Why?
2. Did you ever need the Internet, but it didn't work? Why didn't it work?
3. What do people and businesses do when there is no Internet?

Watch and Listen

Fiber Optic Cables

Glossary

Crash

Fiber optic cables

Go dead

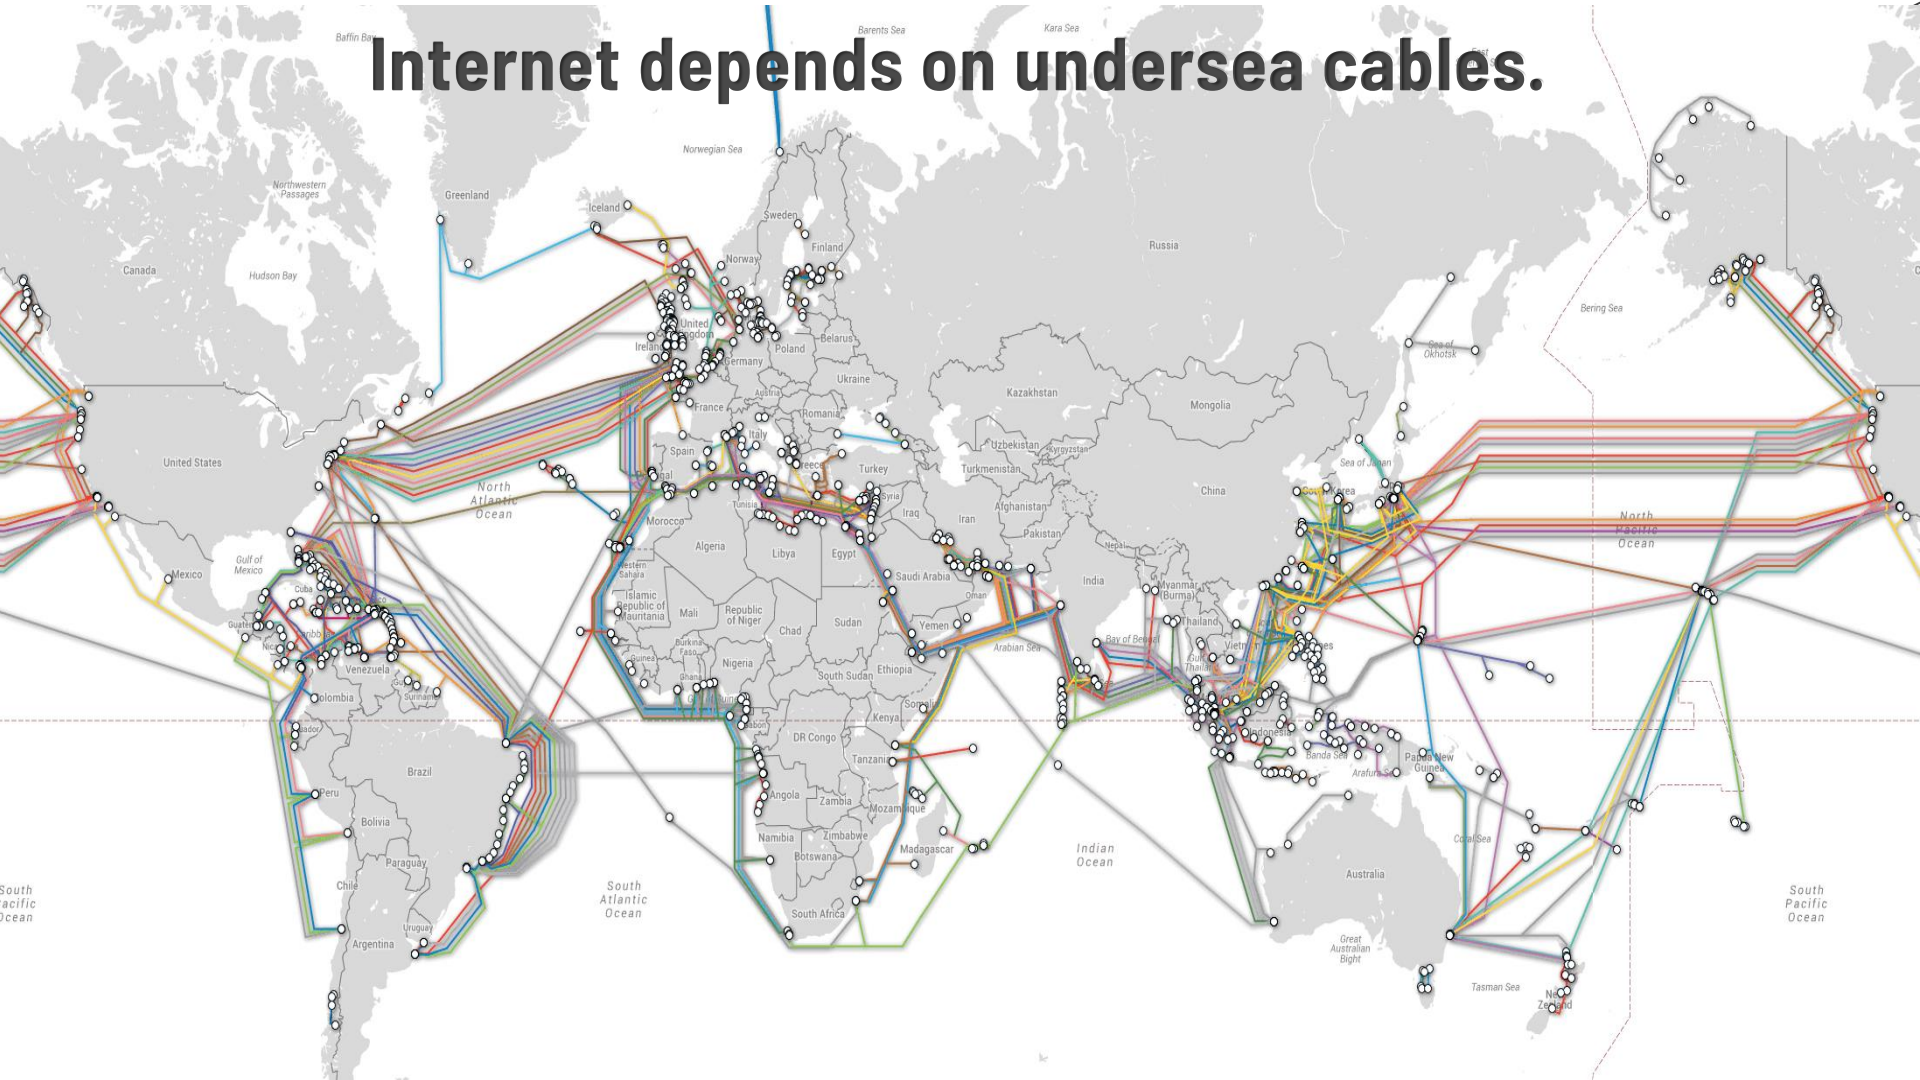

Violent

Volcanic

3. While watching

1. Volcanic activity doesn't change / **changes** the ocean floor.
2. Internet traffic goes through cables at the top / **bottom** of the ocean.
3. **Most** / Some of the Internet traffic goes through cables in the ocean.
4. Cables slowly / **suddenly** went dead.
5. Scientists / **engineers** looked for the problem.
6. They found the cables were **broken** / fixed.
7. It took days / **weeks** to find and repair the cable.
8. A special kind of **ship** / plane helps keep the Internet connected.

Internet depends on undersea cables.

Russian Seabed Warfare Capabilities

Platforms

Targets

Many Undersea Cables

Undersea oil, gas and energy infrastructure

Internet cables

Military communications cables

Submarine detection sensor networks

Submarine Internet Cable

Cables

4. While watching (put into order)

- a. Computers all over Asia crashed.**
- b. It took time to find and repair the cables.**
- c. They looked for the problem.**
- d. Important fiber optic cables went dead.**
- e. Many people couldn't use the Internet.**

4. While watching (put into order)

1. **d. Important fiber optic cables went dead.**
2. **a. Computers all over Asia crashed.**
3. **c. They looked for the problem.**
4. **e. Many people couldn't use the Internet.**
5. **b. It took time to find and repair the cables.**

5. While watching (answer the question)

1. What kind of activity happened in the middle of the ocean?

Volcanic activity

2. When did the important fiber optic cables go dead?

10 years ago

3. Where did the fiber optic cables go dead?

Between Taiwan and the Philippines

5. While watching (answer the question)

4. What moved at the bottom of the ocean and broke the cables?

Heavy rocks

5. What did they use to find and repair the cables?

A special ship called the Wave sentinel

WAVE SENTINEL

Pronunciation for listening

Different consonant sounds of /s/, /ʃ/, /tʃ/

/s/	/ʃ/	/tʃ/
<u>s</u> ubject	<u>sh</u> ow	te <u>ach</u> er
<u>s</u> ave	<u>sh</u> ave	wa <u>ch</u>
<u>s</u> uited	<u>fi</u> sh	ki <u>ch</u> en
<u>s</u> uit	po <u>ll</u> ution	

... 10. While listening (radio program)

Types of robots : industrial, waiter, teacher

Robots are cheaper now than in the past, not expensive

Medical Robot:

Help disabled people walk after accidents :

robotic suit

industrial

waiter

teacher

10. While listening (radio program)

Service Robot:

Saves time: does boring/dirty work, e.g., wash and clean

Elderly people can stay at home longer – important, not a luxury

Research Robot:

Assists scientists with information collection: robot fish

Scientists can find out about ocean pollution quickly

12. Listening for reasons

Robot were not used very much in the past since robots were expensive.

People have a much better quality of life thanks to these robots.

Joey Abbica couldn't walk because of accidents.

Scientists can find out about pollution quickly due to the robotic fish.

Thanks to Wi-fi, Julie was able to do her work on her tablet in a café.

Due to a bad Internet connection, Bill wasn't able to email me.

His laptop broke because he was careless and dropped it.

memory

Predicting the content

1. When someone asks you a question about something that you studied in the past,
 - do you try to remember it?
 - or do you think about how to find the information on the Internet?
2. If you want to know about something,
 - do you ask someone who might know?
 - or do you look for the answer on the Internet?
3. How could using a computer to help you find information change the way your brain works?

6. While listening (write missing information)

Main ideas:

- Scientists looked, in particular, at how computers affect our memory.
 - What we think when we are asked difficult questions has changed due to websites like Google™.
 - The type of information we remember has changed.
 - Computers are not making us stupid, but they are making us lazy.
- 

6. While listening (write missing information)

Additional details:

- They wanted to find out if computers have changes the way we remember information and knowledge.

- In the past, people tried to think of the answer to the question. Now people think about how to find the answer. e.g., they think about what they might put into Google™.

6. While listening (write missing information)

Additional details:

- People now forget facts, especially if they know the information will be saved on the computer. They remember the location of the fact.
- We are spending time remembering where to find information but not on remembering the information itself.

Speaking

Speaking

Main argument:

Computers have changed the way we remember information.

Advantages (+)

1. Computers aren't making us stupid.
2. People remember where and how to find facts.

Disadvantages (-)

1. People forget facts that are stored on computers.
2. Computers are making us lazy.
3. People aren't trying to remember information anymore.

Preparing for Speaking

Giving additional and contrasting information

(+) giving more, or additional information

such as

and

also

as well as

too

besides

(≠) having different, or contrasting ideas

however

but

though

otherwise

on the other hand

instead

Give additional and contrasting information

Computers are important **because** they have changed the way we remember information. People aren't trying to remember information anymore. **Also**, they forget facts that are stored on computers, **but** they remember where and how to find facts. Computers aren't making us stupid. **However**, computers are making us lazy.

Correct transition words or phrases

1. Computers help people look for things, (and / but)
and they can find information quickly.
but they can make people lazy.
 2. Technology is now important for our social lives (and also / , but)
, but traditional activities like writing letters are disappearing.
and also makes it easier for us to communicate with friends.
 3. Robots assist people with difficult jobs (as well as / . However,)
as well as helping take care of elderly and disabled people.
. However, some people believe they are bad because people lose their jobs when robots are used.
- 

To start your report...

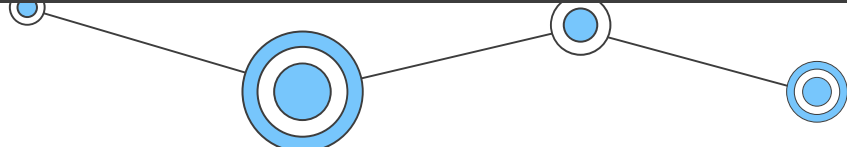

Today I am going to present my report on ...

The main argument I am going to present is ...

To finish what you are saying...

To conclude, ... / In conclusion, ...

... computers are a useful way to store information, but you have to remember where you store it and how to find it again!

Thank You
